

Honesty Integrity Trust: Your Partner of Choice for Strategic Projects

Upton Engineering and Manufacturing is a regional advanced manufacturer, producing precision components and assembly, medium to heavy fabrication, and unique prototyping for the Defence, Aerospace and Space sectors.

VISION STATEMENT

To develop a globally recognised capability, leading change and accelerating Australian Manufacturing through innovation and training.

DIFFERENTIATORS

- Long term strategic view complemented by technology and investment
- Demonstrated Commitment to Defence through AS9100 Accreditation, ISO3834, and DISP
- Precision machining, to heavy fabrication, to 3D printing, to assembly
- Culture of Continuous Improvement
- Capacity for Growth: Machining, Fabrication, Assembly
- Strong Governance Framework
- Specialising in exotic processes and materials
- Proven record within the Mining sector as a partner of choice

INDUSTRIES

- DEFENCE • AEROSPACE
- OIL • ENERGY AND GAS
- MOTORSPORTS • UNIVERSITIES
- RAIL AND MINING

CAPABILITIES

- Advanced CNC machining – 5 axis
- In house CAD/CAM programming
- Digital twin simulation
- Additive manufacturing in plastic composites
- In-house assembly
- Complex Project Management
- Int Accredited Fab Capability
- ISO 27001 in process

QUALITY STANDARDS & OTHER ACCREDITATIONS

- AS9100:D Certified
- ISO 3834 Welding Quality Certified
- QMS ISO 9606 Qualified In-House welders
- Veteran Owned and Proudly signed Veterans Employment Commitment
- DISP
