RF Technologies Capabilities

DISCRIMINATORS:

- Research & design.
- 22 Years' experience
- Brisbane based manufacturing
- Established experience with Defence Primes
- Flexible manufacturing processes
- 100% Australian owned and operated
- Small volume expertise
- Field work experience
- Agile

KEY CUSTOMERS:

CAPABILITIES:

Engineering

- PCBA and black box electro-mechanical system design
- Test and compliance including EMC
- Algorithm design and implementation
- Trade and feasibility Studies

Manufacturing

- PCBA and black box electro-mechanical assemblies
- Rapid prototyping
- Manual and automatic assembly processes for high mix/ low volume to larger volume
- Cable and harness fabrication
- Technical testing

Innovation

- Early-stage conceptual concepts to prototypes
- Pure research to IP generation
- Trade and technology studies
- Expertise in remote low-rate data communication products

Services

- Field and factory upgrades of OEM products
- Radio spectrum management, interference and passive intermodulation (PIM) investigation and remediation
- Radio system and component testing and qualification
- Radio path survey and fade margin analysis
