

CORE CAPABILITY

ECLIPS Logistics is an Australian, veteran-owned engineering and Integrated Logistics Support business developing solutions for digitally integrated supply chains and autonomous systems.

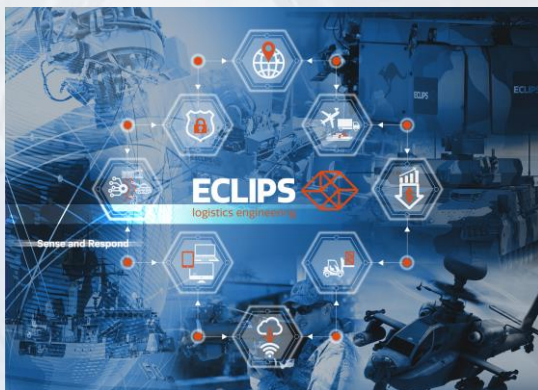

ECLIPS Logistics focuses on improving productivity, performance and safety across customer equipment fleets and logistics operations.

Our Vision: to be the leading provider of Sense and Respond Logistics solutions to Defence while providing outstanding service to customers and rewarding careers to our employees.

Our Mission: to develop solutions for digitally integrated supply chains and logistics automation and provide ILS services to enable more effective and efficient supply chains for our customers.

Focus Areas

- Predictive Logistics
- Condition Based Maintenance (CBM) +
- Vehicle Information Management System (VIMS)
- Health and Usage Monitoring System (HUMS)
- Integrated Logistics Support (ILS)
- Autonomous Systems (Re-Arm, Re-Fuel, Re-Load)
- Unique Identification (UID) Barcodes
- Automated Identification Technology (AIT) RuBee
- In Transit Visibility systems

DIFFERENTIATORS

ECLIPS Logistics:

- is a leading provider of Sense and Respond Logistics solutions for Defence
- has developed Edge to Enterprise data fusion, analytics and distribution systems to improve Situational Awareness and Decision Support for Defence applications
- has contracts in place for digital supply chain technologies and solutions for Defence customers
- has developed and delivered Predictive Logistics capabilities to Defence
- has designed modular distribution systems for Mining, Oil & Gas customers
- Optimises fleet and equipment availability
- is an SAP technology partner
- Is an experienced partner for ASDEFCON Integrated Logistics Support services

PRODUCTS and SOLUTIONS

- ReadyFleet™ software – Edge to Enterprise fleet management and situational awareness software for digitally integrated supply chains
- Condition Based Maintenance software.
- Digitalised Joint Modular Intermodal Logistics System – modular distribution systems and in-transit visibility
- Automated Identification Technology – RuBee, RFID, Low Emission Bluetooth
- Autonomous/Robotic Refuelling Systems
- Autonomous 155mm ammunition handling and loading systems
- Deployable Force Infrastructure
- Redeployable Waste Water Treatment Systems
- Integrated Logistics/Product Support services
- Unique Identification barcoding and labeling
