

BLACK SKY AEROSPACE

PRODUCTS

- Solid rocket motors
- Solid rocket propellant
- RATO (Rocket Assisted Take Off) for UAV
- Precursor chemicals (ammonium perchlorate)
- Guided Weapon and Explosive Ordnance energetics
- Propulsion systems for long range fires
- Hypersonic boosters
- Next generation components (utilising carbon phenolic and other exotic materials).

DISCRIMINATORS

The Black Sky Aerospace team has decades of experience that is ideally suited to defence programs. It has:

- One of the only licensed facilities manufacturing solid rocket propellant in the Southern Hemisphere.
- Internal test and evaluation capability, including access to the world's largest private launch range (3 million acres).
- Extensive knowledge and expertise in local and international regulatory requirements and logistics
- An active launch program with proven technology.

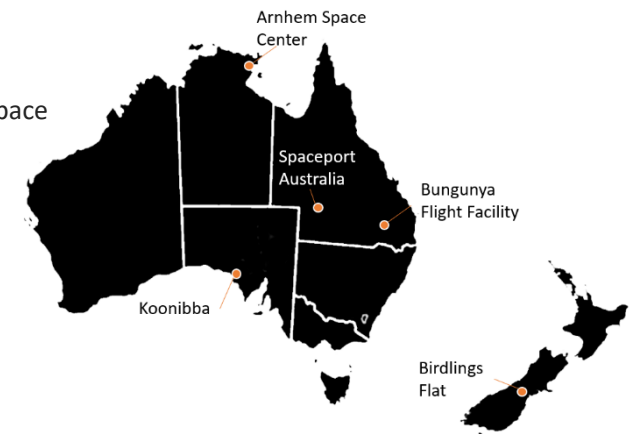

QUALITY STANDARDS AND OTHER ACCREDITATIONS

- Certified to ISO 9001:2015 and AS9100D
- Risk Management Certification
- Explosives Manufacture/Import/Export/Test/Sell/Use Licenses
- Range Safety and Launch Control Certification
